

Questionnaire to Animal Rights advocates to see how much biologicistic speciesism they purport:

Subject in question	How we address nonhuman concerns	How we address human concerns	What is an antispeciesist option and path that you can think of? Form your own opinion.
Language	Sounds, instinctual, “ask an expert” (the biologicistic explicability option), an intended closed system	All human sciences, religions, individual notions, arts come into play, an intended open system	
Thought	Neurosciences, brain research (the biologicistic explicability option), an intended closed system	All human sciences, religions, individual notions, arts come into play, an intended open system	
Social relationships	Animal studies, ethology, behaviorist legacies (the biologicistic explicability option), an intended closed system	All human sciences, religions, individual notions, arts come into play, an intended open system	
Culture	Biology mixed with human animal studies perhaps (the biologicistic explicability option), an intended closed system	All human sciences, religions, individual notions, arts come into play, an intended open system	
Daily Life	Biology (the biologicistic explicability option), an intended closed system	All human sciences, religions, individual notions, arts come into play, an intended open system	
Ecology	Biology (the biologicistic explicability option), an intended closed system	All human sciences, religions, individual notions, arts come into play, an intended open system	
Love	Biology, ethology (the biologicistic explicability option), an intended closed system	All human sciences, religions, individual notions, arts come into play, an intended open system	
Future	Biology, neurosciences (the biologicistic explicability option), an intended closed system	All human sciences, religions, individual notions, arts come into play, an intended open system	
Death	“Nature” (the biologicistic explicability option), an intended closed system	All human sciences, religions, individual notions, arts come into	

		play, an intended open system	
Life	“Nature” (the biologicistic explicability option), an intended closed system	All human sciences, religions, individual notions, arts come into play, an open system
